About Me

I am a senior Computer Engineering student at Istanbul Beykent University. I have developed strong skills in web programming and actively use C# and .NET Core MVC technologies. Through the courses I completed by Murat Yücedağ, I have built several projects and published my personal website. In addition to web development, I am interested in system administration and cybersecurity, and I aim to improve myself further in these fields. Since I have classes three days a week, I am available to work on the remaining days and eager to gain hands-on experience in a professional environment.

Education

İSTANBUL BEYKENT UNİVERSTY - Computer Engineering 2022 - 2026

Experience

SCSOFT BT - Information Securitiy intern 08.2025 - 09.2025
